Review Care Plan MBS 967 or 92030 \$156.55

Quarter 4 - Review

QI – Following Year

Nurse check in face to face or by phone 10997 \$13.65

Review Care Plan MBS 967 or 92030 \$156.55

Review the existing GPCCMP. A new GPCCMP is only required if changes to the patient's condition(s) indicate a need to update or change the plan.

Preparing a written plan which describes:

- ☐ The patient's condition(s) and associated health care needs
- lacksquare Health and life style goals
- Actions to be taken by the patient
- ☐ Treatment and services the patient is likely to need
- ☐ If the patient would benefit from multidisciplinary care refer the patient to allied health providers (up to 5 sessions per calendar year)
- Discuss arrangements to review the plan, the proposed timeframes for review and why review is important

Finalise the GPCCMP

- Record patient's consent to the creation of the plan
- Provide a copy of the plan to the patient and the patient's carer (with patient consent)
- Add a copy of the plan to the patient's records
- ☐ Upload the GPCCMP to My Health Record (with patient's consent)

Review Activities:

- Monitor symptoms and health
- Plan, conduct and review tests and screening
- ☐ Review reports from Allied Health providers and Specialists
- Review and update medications
- Update treatment plan in response to changes in patient needs, treatment options and evidence
- Support patient to understand and self manage their chronic condition

Consider:

- ☐ Case conference with care team
- Family support

Finalise the GPCCMP review

- ☐ Record patient's consent to review the plan
- Provide a copy of the plan to the patient and the patient's carer (with patient consent)
- Add a copy of the plan to the patient's records
- Upload the GPCCMP to My Health Record (with patient's consent)

Review Activities:

- Monitor symptoms and health
- ☐ Plan, conduct and review tests and screening
- ☐ Review reports from Allied Health providers and Specialists
- Review and update medications
- Update treatment plan in response to changes in patient needs, treatment options and evidence
- Support patient to understand and self manage their chronic condition

Consider:

 Other supports such as diabetes education, continence support

Finalise the GPCCMP review

- ☐ Record patient's consent to review the plan
- Provide a copy of the plan to the patient and the patient's carer (with patient consent)
- ☐ Add a copy of the plan to the patient's records
- ☐ Upload the GPCCMP to My Health Record (with patient's consent)

Review Activities:

- Monitor symptoms and health
- ☐ Plan, conduct and review tests and screening
- Review reports from Allied Health providers and Specialists
- Review and update medications
- Update treatment plan in response to changes in patient needs, treatment options and evidence
- Support patient to understand and self manage their chronic condition

Consider:

- Social supports
- Social prescribing/social work referral

Finalise the GPCCMP review

- Record patient's consent to review the plan
- Provide a copy of the plan to the patient and the patient's carer (with patient consent)
- Add a copy of the plan to the patient's records
- Upload the GPCCMP to My Health Record (with patient's consent)

Eligibility -

At least one medical condition that has been (or is likely to be) present for at least six months or is terminal. There is no list of eligible conditions.

GPCCMP Review Frequency -

3-months minimum between review appointments (or when clinically relevant).

Ad Hoc Care -

when a patient attends the general practice outside of this planned care cycle, consider using routine consultation items for episodic care eg - MBS 23
